SORYOUTH offers innovative and technologically superior solutions in Distributed Energy Space & ensures Customer Delight by offering Technologically superior & innovative solutions in the renewable energy space backed by competency, responsiveness, trustworthiness, and reliable after-sales infrastructure.

Generate clean energy

Reduce electricity bills

Earn credits for excess power

Use credits when you need

Sustainable & Reliable

Clean energy for a better tomorrow

Smart Investment

Long term savings & higher returns

OUR VISION

To accelerate the adoption of Distributed Renewable Energy by offering innovative and technologically superior products and solutions.

OUR MISSION

To be the most preferred brand for solar solutions by

Catering to the renewable energy requirements of the community of green crusaders

Adopting and implementing business practices that minimize environmental risks

Ensuring sustained profitable growth thereby creating value for internal & external stakeholders

Embrace digital transformation for higher productivity, flexibility & reach

Timelines are indicative and may vary based on site conditions, approvals & material availability.

OUR VALUE PROPOSITION

Why SORYOUTH?

We deliver end-to-end renewable energy solutions that are engineered for performance, built on trust, and designed to maximize value for our partners.

01

END-TO-END EPC EXPERTISE

- ✓ Design
- ✓ Engineering
- ✓ Procurement
- ✓ Installation
- ✓ Commissioning
- ✓ O&M

02

HIGH-PERFORMANCE SYSTEM DESIGN

- ✓ Optimized generation
- ✓ Advanced shadow analysis
- ✓ Load-based system sizing

03

STRONG COMMERCIAL FOCUS

- ✓ IRR-driven solutions
- ✓ Payback optimization
- ✓ Long-term cost savings

04

RELIABLE EXECUTION

- ✓ Structured project timelines
- ✓ Safety-first approach
- ✓ Quality assurance protocols

MAXIMIZED RETURNS

Higher generation,
better IRR & faster payback

SUSTAINABLE IMPACT

Clean energy solutions
for a greener tomorrow

RISK MITIGATION

Proven processes for
safe & reliable delivery

LONG-TERM PARTNERSHIP

Commitment beyond commissioning
for lasting performance

At SORYOUTH, we don't just build projects.
We build **value**, **trust**, and a **sustainable future**—together.

50,000+
Happy
Consumers

MW+
Clean Energy
Installed

Tons+
CO₂ Emission
Reduced

SERVING DISCOM CONSUMERS

- ✓ Residential Societies & Apartments
- ✓ Commercial Establishments
- ✓ Industries & Factories
- ✓ Institutions, Schools & Colleges
- ✓ Government Buildings & Facilities

Trusted by
DISCOM Consumers
across Maharashtra
and beyond

Strong partnerships. Smart solutions.
Sustainable tomorrow.

TOGETHER, WE
POWER PROGRESS.

Expertise You Can Trust
Backed by leading names
in the energy sector

End-to-End Solutions
From design to installation
and maintenance

Quality & Safety First
International standards with
zero compromise

Long-Term Value
Built for performance,
built for the future

OUR CLIENTELE

Trusted by leading organizations across industries

mahindra

Kustomjee®

STRONG
RELATIONSHIPS.

RELIABLE
SOLUTIONS.

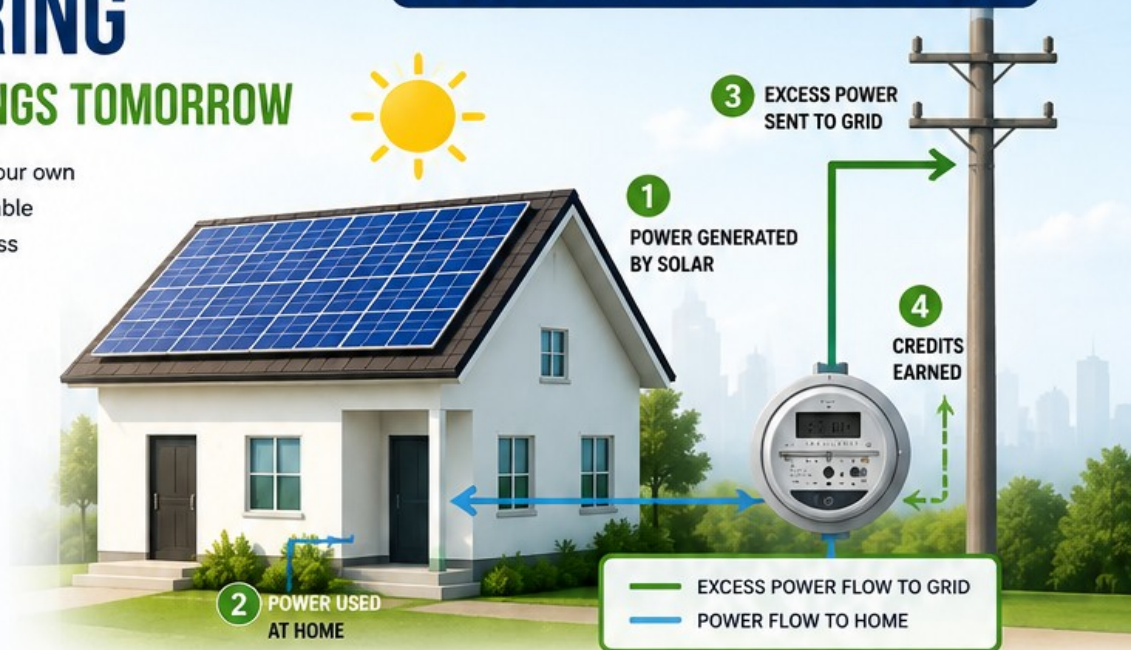

SHARED
SUCCESS.

NET METERING

POWER TODAY, SAVINGS TOMORROW

Net metering allows you to generate your own electricity from solar (or other renewable sources) and earn credits for the excess power you send back to the grid.

-  **Generate clean energy**
Reduce electricity bills
-  **Earn credits for excess power**
Use credits when you need

TOP BENEFITS OF NET METERING

LOWER ELECTRICITY BILLS

Reduce your monthly electricity costs by using your own clean energy and earning credits for surplus power.

EARN CREDITS

Extra energy you send to the grid earns credits that offset your future electricity consumption.

FASTER RETURN ON INVESTMENT

By minimizing your electricity bills, net metering improves the payback period of your solar system.

PROMOTES CLEAN ENERGY

Encourages the use of renewable energy and reduces reliance on fossil fuels.

ENERGY SECURITY

Generate your own power and protect yourself from rising electricity prices.

SUPPORTS A SUSTAINABLE FUTURE

Contributes to a cleaner environment for future generations.

EXAMPLE OF UNITS (MONTHLY)

Let's understand with a simple example

	Solar Generation	500 kWh
	Self Consumption (used in home)	300 kWh
	Excess Exported to Grid	200 kWh
	Power Imported from Grid (at night / cloudy days)	150 kWh

Net Units = Import – Export
150 kWh – 200 kWh = -50 kWh

Net Result: You Earn 50 kWh Credits

These 50 kWh credits will be carried forward and adjusted in future bills.

 If export is more than import, credit is carried forward or settled as per state regulations.

HOW NET METERING WORKS – STEP BY STEP

-  **1 YOUR SOLAR SYSTEM GENERATES POWER**
Your system produces electricity during the day.
-  **2 POWER YOUR HOME**
Use the solar power to meet your home's electricity needs.
-  **3 EXCESS POWER SENT TO GRID**
Surplus electricity is sent to the utility grid.
-  **4 EARN CREDITS**
You earn credits on your utility account for the excess power.
-  **5 USE CREDITS WHEN NEEDED**
Credits are used when your solar system generates less power (night, cloudy days, etc.).

SAVE MORE. LIVE GREENER.

Net metering turns your solar investment into long-term savings while helping build a cleaner, greener tomorrow.

SAVE MONEY

SAVE ENERGY

SAVE PLANET

BETTER FUTURE

SOLAR POWER PLANT PROJECT TIMELINE

—◆ ROOFTOP SOLAR PROJECT – 10 TO 12 WEEKS ◆—

Our structured approach ensures timely execution, high quality and maximum efficiency for your rooftop solar project.

Generate clean energy
Reduce electricity bills

Earn credits for excess power
Use credits when you need

Sustainable & Reliable
Clean energy for a better tomorrow

capped at

Subsidy for GHS/RWA

(Group Housing Society/Resident Welfare Association)

Rs. **18,000**
per kW

for common facilities, including EV charging, up to 500 kW Capacity (@3 kW per house)
with the upper limit being inclusive of individual rooftop plants installed by
individual residents in the GHS/RWA

For special states, an additional 10% Subsidy will be applicable per kW

Suitable Rooftop Solar Plant Capacity for households

Average Monthly Electricity Consumption (units)	0-150	150-300	>300
Suitable Rooftop Solar Plant Capacity	1-2 kW	2-3 kW	Above 3 kW

COMMERCIAL OFFER

Client Name : Test

Project Location : Kalyan

Project Size : 50.0 kW

Offer No. : P-2026-75992

Offer Date : 21 Aug, 2026

Validity : 15 Days from the date of offer

OFFER SERVICES	QTY (kW)	AMOUNT (₹)
System Configuration for EPC Engineering, Procurement & Construction of complete solar power plant.	50.0 kW	₹ 0.00
Solar Power Plant Supply of Design, Installation & Commissioning Supply of all solar components, installation, testing, and commissioning.	Included	Included
Subtotal		₹ 0.00
CGST @ 4.45%		₹ 0.00
SGST @ 4.45%		₹ 0.00
Total Project Cost (Inclusive of all taxes)		₹ 0.00
Subsidy / AD Benefits As applicable		₹ 9,00,000.00
Net Investment (After Subsidy / AD Benefits)		₹ 0.00

Notes:

- Prices are exclusive of any statutory changes.
- This offer is subject to our terms & conditions.
- Payment terms and delivery schedule will be as per agreed contract.

Balance Of System

Component	Details	Qty	Specifications
Solar Modules	Premier Energies Topcon Half Cut	84 Nos	Rayzon Solar Topcon Bifacial DCR 600 Wp
Inverter	String Inverter with MPPT	1 Nos	Growatt/Sungrow 50 kW
Mounting Structure	RCC Rooftop	1 Lot	HDGI Square Pipe 1.7-2 mm with 80-120 micron Zinc Coating
DC Cable	4 sq.mm	As per design	Polycab 1.1 kV Standard EN 50618 / IEC 62930 UV Resistant - Yes
AC Cable	As per Design	As per design	XLPE Aluminium Armoured Cable as per IEC Standard
DCDB	As per design	1 No	DC Isolator, DC SPD Type-II, String Fuses Enclosure - IP65 Weatherproof
ACDB	As per design	1 No	MCCB/MCB, AC SPD Type-II Enclosure - IP65 Weatherproof
Earthing Kit	Chemical Earthing	3 Nos	Electrode Size - 17.2 mm Copper Bonded / GI Electrode Earth Resistance less than 5 Ohms Compliance IS 3043
Lightning Arrester	Standard	1 Nos	IS/IEC Standards
Connectors	MC4 compatible	As required	1500 V DC Protection Class - IP68
Monitoring	RMS App-based	1 Set	Real-Time Generation, Fault Alerts, Historical Data Analysis
Tags	Aluminum Engraved	1 Set	Aluminum Engraved Identification Tags
Fire Extinguishers	As per compliance	1 Set	As per MNRE / Electrical Compliance Requirements

Evaluation Sheet for Capex Model

Project Specification		Accelerated Depreciation Benefits

SOLAR PERFORMANCE & FINANCIAL ANALYSIS

Detailed 12-Month Generation Profile & 30-Year Cumulative Financial Growth

50.0 kWp
SYSTEM CAPACITY

Monthly Energy Generation (Year 1)

Annual Total: 70,798 kWh

Daily Avg: 193 Units

30-Year Projected Cumulative Financial Savings

Total 30-Yr Savings: ₹ 5.28 Cr

Grid Tariff: ₹ 19.0/kWh

Project's Scope

Sr. No.	Category	Scope Item	Soryouth 's	Client's
1	Supply of Items	PV Solar components as per BOM & BOQ	Yes	-
		Roof / Superstructure / Elevated Structure	Yes	-
		Data Logger	Yes	-
2	Freight	Transportation	Yes	-
		Packing & Handling	Yes	-
3	Material Handling at Site	Safe unloading of material from vehicle	Yes	-
		Lifting & shifting of materials at site	Yes	-
		Parking space / permission for vehicles	-	Yes
4	Material Storage	Safe & secure storage space at site	-	Yes
5	Roof	Waterproofing	-	Yes
		NOC / Permission for Roof Usage	-	Yes
		Safe Access to Installation Site	-	Yes
		Clearance of Installation Area	-	Yes
6	Liaisoning	Net Metering Liaisoning with Utility	Yes	-
7	Installation & Commissioning (I&C)	Design & Engineering of Solar PV System	Yes	-
		Tools, Tackles & Installation Consumables	Yes	-
		Solar PV system installation services	Yes	-
		Lightning Arrestor (LA)	Yes	-
		Earthing & system safety	Yes	-
		Civil works for installation	Yes	-
		Testing & Commissioning	Yes	-
8	Statutory Approvals	Additional utility permissions	-	Yes
		Load Enhancement / Sanctioned Load Changes / Name Change	-	Yes
		Modifications in Existing Control Panel	-	Yes
9	Discom Metering	Permissions & Documentation	Yes	-
		Testing of Meters & Accessories	Yes	-
10	Internet Facility	Wi-Fi / SIM / LAN availability at site	-	Yes
11	AMC	Annual Maintenance Contract	Optional	-
12	Others	Training / Maintenance Guidelines	Yes	-
		Soft water for module cleaning	-	Yes
		Tree Trimming / Shadow Removal	-	Yes
		Electricity & Water During Construction	-	Yes
		Design Approvals (if applicable)	-	Yes
13	Warranty	Warranty Certificates & Documentation	Yes	-

Term's & Conditions

Sr. No.	Section	Details
1	Pricing & Validity	Proposal valid for 15 days. Price subject to change if scope, specifications, or statutory requirements change. Excludes permits, panel upgrades, roof repairs, trenching unless specified.
2	Taxes	GST shall be charged extra at actuals as per applicable rates.
3	Freight & Logistics	Inclusive of transportation, packing, forwarding, and unloading at site.
4	Technical Site Assessment	Site verification post-LOI/PO. Any variation may impact cost. No warranty on roof or electrical panel condition.
5	Delivery & Timeline	Delivery within 8 weeks from advance payment and PO confirmation. Subject to extension due to delays, approvals, force majeure, or client-side dependencies.
6	Approvals & Documentation	Seller will assist as agent for approvals. Timelines depend on authorities; delays not attributable to Seller.
7	Proposal & IP	All documents remain Seller's IP. Cannot be reused without consent. Financial estimates are indicative only.
8	Insurance	Seller responsible till commissioning. Post-delivery and post-commissioning insurance responsibility lies with Purchaser.
9	Warranty (General)	Equipment and services warranted against defects as per defined terms.
10	Warranty (Equipment)	Modules: 12 yrs product + 30 yrs performance. Inverter: 5 yrs. BOS: 2 yrs
11	Warranty Exclusions	Excludes wear & tear, misuse, unauthorized changes, environmental damage, theft, force majeure.
12	Pre-Warranty Damages	Damages due to negligence or external factors before warranty start shall be repaired at Purchaser's cost.
13	Excluded Costs	Transport, reinstallation, customs, and related costs not covered under warranty. Replacement does not reset warranty.
14	Change in Law	Any cost or timeline impact due to regulatory changes shall be borne by Purchaser.
15	Client Obligations	Timely payment, site access, utilities, approvals, and material support to be ensured by Purchaser.
16	Payment Delay Remedies	Seller may charge 12% interest, suspend work, terminate contract, and recover losses.
17	Suspension	Costs due to suspension borne by Purchaser unless caused by Seller.
18	Termination	Either party may terminate for breach with 30-day cure period. Purchaser liable for completed work and associated costs.
19	Intellectual Property Rights	Seller IP to be used only for plant operation. Misuse subject to indemnity.
20	Limitation of Liability	Seller liability limited to 3% of contract value.
21	Consequential Damages	Neither party liable for indirect or consequential losses (profit, revenue, generation).
22	Indemnity	Both parties indemnify each other against contractual breaches.
23	Force Majeure	Covers uncontrollable events (natural disasters, war, etc.). Financial inability excluded.

Yours truly,

Thank You for Choosing
